

Convert RJ45 to 3-Pin Connection

Easily convert the MOD/EXP port on sensorProbeX+ from CAT5 to 2 wire serial cable.

sensorProbeX+ comes equipped with an RS485 Modbus and Expansion port. When using this RJ45 port to connect Modbus appliances, the Modbus Adapter makes it easier to connect a 2 wire serial bus cable to the RJ45 port, converting the RJ45 connector into a 3 pin terminal block connection.
